Algonquin Park Bibliography

1996

Compiled by Ron Tozer and Nancy Checko

This bibliography is a compilation of over 1800 references dealing with Algonquin Park and its resources. Basically we have included all books, theses, scientific papers, internal reports, and magazine articles which in our judgement could be of use to anyone studying Algonquin Park. When a reference is housed in the Algonquin Park Visitor Centre Library, a Reference Number appears in the left margin.

In any work of this nature, decisions have to be made as to what should or should not be included, and a brief word is in order on the criteria used in compiling this list. With the exception of the considerable number of papers based on work done at the Algonquin Radio Observatory, and annual forest insect outbreak reports, we have included all research papers done in Algonquin or based on material taken in the Park. This means that rather specialized papers on the anatomy or systematics of invertebrates are included solely because the material was collected in Algonquin Park.

In most cases we have not included secondary sources (e.g., *The Mammals of Eastern Canada*). Even though such sources often contain many scattered references to Algonquin, we have omitted them when, in our judgement, they add little to primary sources already included in this bibliography.

As an aid in locating references in specific fields we have broken this bibliography into the categories listed below:

Category	Page
Amphibians and Reptiles	2-5
Archaeology	6-7
Birds	8-16
Fish and Limnology	17-42
Forest management, research, and ecology	43-50
Geology and geography	51-54
History	55-60
Invertebrates and Parasites	61-82
Mammals	83-96
Park management and recreation	97-112
Plants	113-116

Please note that we cannot undertake to supply copies of references. Interested parties may consult them in the Library of the Algonquin Park Visitor Centre (where newspaper clippings and historical photographs are also housed). Making an appointment in advance is required, however. Limited photocopying of references (at 25¢ per page) may be undertaken.

Finally, we must emphasize that this list is certainly incomplete and we solicit any additional references which readers may be able to provide. These should be addressed to: Park Naturalist, Ministry of Natural Resources, Box 219, Whitney, Ontario K0J 2M0. Additions will be made in future printings of this bibliography.
